Automatic torque screwdriver set DINAPLUS

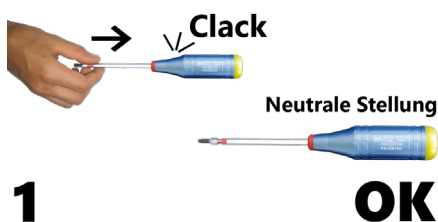

Features and advantages:

- The DINAPLUS system prevents the screw from being over-tightened
- One handle for 14 Torx inserts from T6 to T20 - simple, automatic and user-friendly!
- Easy to use - no additional torque adjustment (Nm) required when changing inserts
- Fewer damaged screws on inserts and carriers

Handling:

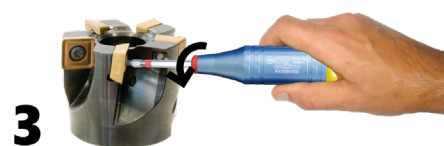

1. Insert the bit insert suitable for the Torx profile into the handle and ensure that it engages correctly with an audible click. The number on the bit insert defines the correct Torx size.

2. To screw on, turn the screwdriver clockwise (CW) to the click point (click). Based on the bit insert code, the correct torque is automatically achieved after the click.

3. The counter-clockwise screwdriver (CCW) can be used for loosening.

The bit insert can be replaced in the neutral position or after the click point (click).

ART. PKITDP00000 Kit content

- 1x screwdriver
- 1x TORX T6 (Nm0,6)
- 1x TORX PLUS IP6 (Nm0,6)
- 1x TORX T7 (Nm0,9)
- 1x TORX PLUS IP7 (Nm0,9)
- 1x TORX T8 (Nm1,2)
- 1x TORX PLUS IP8 (Nm1,2)
- 1x TORX T9 (Nm1,4)
- 1x TORX PLUS IP9 (Nm1,4)
- 1x TORX T10 (Nm2,0)
- 1x TORX PLUS IP10 (Nm2,0)
- 1x TORX T15 (Nm3,0)
- 1x TORX PLUS IP15 (Nm3,0)
- 1x TORX T20 (Nm5,0)
- 1x TORX PLUS IP20 (Nm5,0)
